Beautifully bespoke

Hamilford Design offers the ultimate interior design service to its clients in London

Founded in 2000, Hamilford Design is a luxury interior design studio based in Notting Hill. Led by Manuela Hamilford, the team covers all aspects of interior design, with projects including listed residences in London, townhouses in New York, prestigious country estates and hotels across Europe.

Manuela was born in Vicenza, Italy and moved to New York City to start her career in design, where she gained a flair for interiors and a passion for bespoke home furnishings. She headed to London to start her own interior design studio, and Hamilford Design was born.

Since it was founded, the studio has flourished. Manuela injects her own flair, creating elegant, warm and luxurious interiors whilst keeping clients' unique stories at the heart of their projects. The majority of homes undertaken are in London, ranging from St John's Wood and Notting Hill to Chelsea Harbour and Kensington. Whether it is furnishing a penthouse apartment or the complete renovation of a large townhouse, the team apply the same exacting principles.

Hamilford Design offers "the full package", says

Manuela, working closely with clients from conception to completion. Its in-house construction team oversees everything from planning permissions and party wall agreements to electricals. Concepts are designed as 2D renders so that the client can visualise exactly what they are getting from the outset.

When it comes to the furnishings, "pretty much everything is bespoke," explains Manuela. "It needs to work together, to look right."

Fabrics, shapes and sizes are meticulously researched. From the kitchens and bathrooms down to carefully curated kitchenware and candles, the result is an immaculately presented home. Such turnkey properties turnkey are in demand for luxury rentals and stand out in a competitive sales market.

The breadth of Studio Hamilford's work demonstrates its high level of professionalism.

But for Manuela, simple rules apply. "Interior designers should listen to the remit and then adapt." And nothing is too much trouble for the client, she says. "We just want them happy." ■
